As a highly skilled **Fullstack Engineer** with a proven track record, I have extensive experience in creating stunning and precise user interfaces, utilizing cutting-edge technologies to integrate APIs into web applications. I am adept at building secure, maintainable, and well-architected product features that provide exceptional user experiences.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS/Scss, SQL (Postgres), Python

Frameworks & libraries: NextJs, React, Angular, Bootstrap, Tailwindcss, React Context API, MongoDB, Express.js, Node, axios

Developer Tools: Git, Github, npm, Netlify, Heroku, VS Code, Vercel, Postman, Thunder Client, Redux, React Hooks, React Query,

Design Tools: Figma, Framer

Soft Skills: Communication, Collaboration, Critical Thinking, Problem Solving

EXPERIENCE

Frontend Engineer

September 2023 – March 2024

Freelance

Remote

- Worked on a web3 based blockchain technology website built for connecting people with easy access to blockchain technology.

Frontend Engineer

March 2023 – August 2023

Tabulera

Remote

- Built pixel-perfect user interfaces using axios, React Query, TypeScript, NextJs, Yup, CSS, and Bootstrap. " Architected secure and easily maintainable product features " worked closely with backend engineers to integrate APIs into the product " Optimized HTTP request handling with React Query, leading to a decrease in loading times and improvement in overall application performance.

Frontend Engineer

January 2023 – March 2023

Olutimedia solutions

Remote

- Actively contributed to product development by conducting code reviews and participating in feature brainstorming sessions, resulting in the release of high-quality features.
- Built pixel-perfect user interfaces using axios, React Query, JavaScript, CSS, and Bootstrap.

Frontend Development Intern

Olutimedia solutions

June 2022 – August 2022

Remote

- Worked with designers to develop amazing and responsive websites.
- Collaborated with other developers through Git and GitHub.
- Wrote documentation for a theme website.

EDUCATION

University of Ibadan, Ibadan

February 2017 – June 2023

B.Sc. Civil Engineering

PROJECTS

Lithium-Digital | React,

- Lithium Digital is a web3 based blockchain technology website built for connecting people with easy access to blockchain technology.

School LMS | React, React Hooks, Bootstrap, MongoDB, React Query,

- I built a fully functioning school admin and student portal that help teachers record scores and student get their result
- It helps Secondary schools to reduce distance between parents and the school
- Implemented a pagination logic displaying data from the API into discrete pages for easy read.

Darul Athar Website | React, React Hooks, Bootstrap

- Built a fully functioning and responsive website for a school
- The website allows prospective parents to know everything about the calender and the school.
